Berkeley-Charleston-Dorchester Area

Local Early Action Plans

June 2006

Early Action Compacts June 2006 Progress Summary Table

A. Control Measure under Consideration	B. Summary Description of Measure	C. Program/Measure Status	D. Specific Implementation Date	E. VOC Reduction	F. NOx Reduction	G. Resources (FTE's, \$\$)	H. Additional Information
B-C-D, SC (Designated - Attainment)							
<p style="text-align: center;">JUNE 2006 BERKELEY COUNTY Based on stakeholder consultation and taking into consideration resource and political constraints, the following emission reduction strategies remain under consideration. The County will continue to evaluate the air quality within the county and may implement one or more of the following measures under consideration.</p>							
Awareness	Joined and currently participate in the SC Early Action Plan for 8-hour ozone standard	continuing	Dec-02	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Awareness	Meet with SCDHEC staff and County staff to collect and disseminate information including ideas and suggestions that will attempt to maintain current attainment for County. Forwarded information to municipalities, the Water and Sanitation Authority and the School District within the County.	have not had any meetings in 2005	June and October 2003, February 2004	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Awareness	Information for public available with applicable web links on the County's website	continuing	Jun-03	n/a directionally sound	n/a directionally sound	n/a	
Awareness - Energy	Current policy of turning off lights, computers and HVAC units daily of County equipment in accordance with Energy Management Guidelines.	continuing	Jun-03	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Awareness - Energy	Best management practices in accordance with Energy Management Guidelines (HVAC control systems)	continuing	When reasonably cost effective	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Awareness - Energy	Provide literature to County employees on how individually, people can improve air quality	as available	Spring, Fall 2005	n/a directionally sound	n/a directionally sound	n/a	
Ozone Action Coordinator	Designated County staff person responsible for ozone education/outreach and dissemination of ozone standard.	in place	Mar-03	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Land Use	Zoning ordinance requires landscaped buffers between unlike uses, including trees and shrubs	implemented	Aug -01 and Nov. -04	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Land Use	Endorse cooperative initiative between County, Conservation District and Conservation Trust of "Greenspace Initiative" that promotes the protection and conservation of recommended areas on a strictly voluntary basis.	continuing	Sep-00	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Conservation	Implement "Greenspace Initiative"; promote the protection and conservation of properties in accordance with the plan established in September 2000. Currently, 44% of the County is "green/blue space" (33% land, 11% water) in conservation.	continuing	Sep-00	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Land Use	Encourage the development of non polluting industries	continuing	As directionally sound for betterment of County	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Conservation	Promote and encourage increased activity of recycling goods (plastics, metal, glass, etc.) through the Berkeley County Water & Sanitation Authority	continuing	Specific date unknown - implemented	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Conservation	Berkeley County Water & Sanitation Authority actively involved in composting and educational programs for backyard composting.	continuing	Specific date unknown - implemented	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Conservation	Berkeley County Water & Sanitation Authority installed passive gas vents during the closure of the County's "Pre-Subtitle D Landfill".	implemented	Prior to 2004	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Mobile Sources	Replaced gasoline golf cart with electric model.	will continue to consider regarding costs	June 24, 2005	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Mobile Sources	Purchased two replacement vehicles for Sheriff's department with Flex Fuel (ethanol mixture or regular fuel) alternative.		Feb-04	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Mobile Sources	Operate on scheduled maintenance of vehicles to ensure best management practices are being utilized to decrease the buildup of pollutants in engines.	continuing	Specific date unknown - implemented	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Mobile Sources	Support staggered work schedules to mitigate commuter traffic congestion and provide citizen service	will consider as information available	When reasonably cost effective for County	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Awareness - Energy	Purchase "Green Power"	will consider when reasonably cost effective	When reasonably cost effective	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Awareness - Energy	Participate in "Rebuild South Carolina" (County has participated in the past)	will consider when reasonably cost effective	When reasonably cost effective	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Awareness- Energy	Install solar heat system in new County facilities or those to be renovated.	will consider when reasonably cost effective	When reasonably cost effective	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Mobile Sources	Consider continued replacement of gasoline golf carts with electric golf carts (current concern is payload capacity)	will consider when reasonably cost effective	When reasonably cost effective	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Mobile Sources	Consider purchase of hybrid vehicles for departments that primarily utilize their vehicles for traveling on highways.	will consider when reasonably cost effective AND availability allows	When reasonably cost effective	n/a directionally sound	n/a directionally sound	n/a	See Comment #3

A. Control Measure under Consideration	B. Summary Description of Measure	C. Program/Measure Status	D. Specific Implementation Date	E. VOC Reduction	F. NOx Reduction	G. Resources (FTE's, \$\$)	H. Additional Information
Mobile Sources	Support development of park and ride facilities within the tri-county region	will consider when reasonably cost effective	When reasonably cost effective	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Conservation	Extending current pilot program for the installation of flares (to burn and neutralize any potentially harmful emissions) at the closed "Pre-Subtitle D Landfill" and if successful, additional flares will be purchased and installed.	continuing	When program is determined and reasonably cost effective for expansion of program	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Conservation	Berkeley County Water & Sanitation Authority in preliminary planning stages of long range program for the installation of a landfill gas extraction system including a gas to energy (LFGTE) facility which would also help minimize potentially harmful emissions at its operational municipal solid waste landfill.	continuing planning efforts	When reasonably cost effective	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Comments: 1. December 2004 - SC EAC SIP - activity not quantified for several reasons (first) in accordance with EAC Protocol, after all adopted Federal and State controls were accounted for in the modeling, it was determined that local controls were not necessary to demonstrate attainment of the 8-hour ozone standard. Measures were submitted by the local areas to show their continued support and commitment to the EAC process. (second) this activity is directionally sound and should provide air quality benefits and in some cases measurable results. The progress toward implementing this activity and the benefits derived will be documented as a part of the ongoing reporting requirements. 2. December 2003 - Progress Report - See - http://www.scdhec.gov/eqc/baq/html/eap_dpr_eac.html - additional information provided by the county to include "findings", "advantages/disadvantages", "recommendations", "costs", etc.... 3. March 2004 - Local Early Action Plan - See - http://www.scdhec.gov/eqc/baq/html/eap_dpr_eac_0304.asp 4. June 2004 - Progress Report - See - http://www.scdhec.gov/eqc/baq/html/eap_dpr_eac_0604.asp 5. December 2004 - Progress Report - See - http://www.scdhec.gov/eqc/baq/html/eap_dpr_eac_1204.asp 6. December 2004 - SC EAC SIP - Including Appendix 8 (Local Early Action Plans and the Air Quality Awareness and Improvement Policy) and Appendix 16 (County Level Emission Reductions and Descriptions for the Ozone EAC Areas) - See - http://www.scdhec.gov/eqc/baq/html/eap_sip.html 7. April 20, 2005 - Correspondence to Mr. Palmer including clarifying supplemental information to the EAC SIP submittal of December 2004. - See - http://www.scdhec.gov/eqc/baq/html/eap_sip.html 8. TUESDAY, JUNE 06, 2006 12:00 AM

Rozier to make announcement on industry

By yvonne m. wenger
The Post and Courier

Using rotting garbage to produce energy is part of a new plan for the Berkeley County landfill. The rest will be revealed today when Supervisor Jim Rozier announces the expansion of an existing industry.

Although Rozier is tight-lipped on the plan, he said it will mean between 25 and 35 jobs for the county and a boost to the tax base. The industry announcement is expected to draw praise from environmental watchdogs.

"It is going to really improve the environment in Berkeley County," Rozier said Monday. "This is so far-reaching."

Dana Beach, the executive director of the Coastal Conservation League, lauded the project for its plan to tighten controls on wastewater and sewage sludge.

"It's amazing," he said. "It should be emulated around the country."

Laura Varn, a spokeswoman for Santee Cooper, said the Moncks Corner-based utility is not involved with today's announcement. The company is, however, in preliminary discussions with Berkeley officials to open a methane-to-energy plant at the county landfill, which sits off U.S. Highway 52 north of Goose Creek.

Santee Cooper operates methane plants in Horry, Lee and Richland counties and will open another in Anderson County later this year.

The green power facilities, which can be used to provide energy to homes, work by capturing the gas before it enters the atmosphere.

The long-awaited announcement of Project Lighthouse is also expected to come sometime soon.

Officials have been mum on the major manufacturer that will add at least 200 jobs and invest more than \$80 million in the county.

Reach **Yvonne M. Wenger** at 745-5891 or ywenger@postandcourier.com.

This article was printed via the web on 6/6/2006 8:42:48 AM . This article appeared in The Post and Courier and updated online at Charleston.net on Tuesday, June 06, 2006.

A. Control Measure under Consideration	B. Summary Description of Measure	C. Program/Measure Status	D. Specific Implementation Date	E. VOC Reduction	F. NOx Reduction	G. Resources (FTE's, \$\$)	H. Additional Information
<p align="center">JUNE 2006 CHARLESTON COUNTY Based on stakeholder consultation and taking into consideration resource and political constraints, the following emission reduction strategies remain under consideration. The County will continue to evaluate the air quality within the county and may implement one or more of the following measures under consideration.</p>							
Appoint an Ozone Action Coordinator to alert media and public on high ozone days.	Larry Hodge, Risk Manager, monitors DHEC website, and coordinates with County Public Information Office to notify county departments when local levels are elevated; and with Radio Communication Manager to alert field employees. (Note: currently DHEC does not do forecasts for the Lowcountry.) Information also is included on County website, for public access. When DHEC alerts are available for this area, PIO will coordinate media notifications. Ozone action alerts will be posted to the Amber Alert System, if local levels reach the warning or action stage.	No ozone forecasts provided for Charleston County	Begun with 2003 Forecast Season	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Add Ozone Alert to Emergency Information on County website.	Public Information Office has added Ozone Danger information to Emergency Information section of County web-site (www.charlestoncounty.org). Information links to DHEC Spare the Air Ozone Forecast and to EPA informational sites. Ozone reduction measures and information are included.		2003 Forecast Season - completed	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Increase opportunity for residents and businesses to conduct electronic transactions with the county, eliminating drive time.	The county website allows residents to conduct a great deal of County business on-line, thus eliminating vehicle trips to County office locations. E-business opportunities are being expanded constantly.	Now available: research property records, deeds/mortgages, tax records, court records, marriage license, estate/wills; pay taxes on-line; request building inspection; submit public work order request; apply for jobs; renew a business license; obtain county bid solicitations, and more. Links to hundreds of related websites.	Initial phase completed; on-line services added monthly	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Promulgate list of strategies to local government entities.	The County will share its strategies with local government entities within the county to promote regional efforts and encourage similar actions at the municipal level		FY 2004	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Develop and implement an ozone public education plan.	Charleston County, through its Public Information Office and Safety and Risk Management Office, has implemented a comprehensive public information campaign related to health impacts of ground-level ozone, and strategies to reduce ozone producing emissions. This addresses best driving practices, fueling, vehicle maintenance, lawn mowing, consumer education, healthy lifestyle and environmental changes, and other measures. If funding or private partnerships are identified, programs to test gas caps and provide replacements, or others, will be implemented. Information is disseminated through newsletters, website, public service announcements and public events, and at county facilities.	Distributed material made available by SCDHEC related to Driving Smarter and Things You Can Do For Cleaner Air; also Car Care Awareness, and seasonal bookmarks and flyers. Material provided to County employees, and to the public at the information desk of the Public Services Building. Participated in Bike to Work Week in May 2006. Coordinated an Earth Day Festival with other environmental agencies in May 2006.	Efforts begun in 2004	n/a directionally sound	n/a directionally sound	n/a	
Expand use of hybrid cars.	Charleston County currently has one hybrid car in its fleet, a Honda Civic used by the Solicitor (1.3-liter 4-cylinder gasoline engine with a 10-kilowatt electric motor). Fuel efficiency is estimated at 46/51 city/highway miles per gallon. As funding allows, additional hybrid vehicles will be added to the fleet where use and mileage history provide a suitable fit. It is recognized such replacement would impact four cost centers: replacement, training, shop equipment and operating (parts) costs. Implementation will be dependent on commitment to and availability of funding.	In FY 2006 one additional hybrid Honda Civic was purchased for the Solicitor's Office. A barrier to growing our hybrid fleet is limited availability and omission of these vehicles on state procurement contracts. In April 2006 Charleston County submitted a grant application to the SC Budget and Control Board for sufficient funding to cover the cost difference between purchasing 15 standard gasoline-fueled vehicles on state contract, and the cost of 15 hybrid mid-size sedans. If funding is received, these hybrids will be provided to high-mileage users within the County work-force.	FY2005	n/a directionally sound	n/a directionally sound	n/a	
Implement criteria to evaluate departmental vehicle requests.	Charleston County has developed criteria to evaluate vehicle requests, which include consideration of miles driven, and industry standards based on user requirements. The goal is to 'right-size' the county fleet, considering both the number of vehicles and the size and/or type of vehicle.	Criteria is in place and was utilized to evaluate requests for FY'07. For FY'06, 'pools' of multi-user vehicles replaced individually assigned vehicles; and home garaging has been restricted.	FY2005	n/a directionally sound	n/a directionally sound	n/a	
Include vehicle fuel economy and emission ratings in procurement	Fuel efficiency and emission ratings are included in specifications for procurement of vehicles.		FY2005	n/a directionally sound	n/a directionally sound	n/a	
Purchase vehicles and light trucks to meet new EPA standards on emissions.	The EPA has announced more protective tailpipe emission standards for all passenger vehicles, including sport utility vehicles, vans and pick-up trucks. The agency also has developed lower standards for sulfur in gasoline which will require passenger vehicles to be significantly cleaner. Both took effect beginning in 2004. Charleston County is complying with the new standards as they are phased in and as we replace vehicles.	Fleet focus is on flexible-fuel vehicles, to be staged to use ethanol when available (see below).	FY2004	n/a directionally sound	n/a directionally sound	n/a	
Purchase replacement diesel heavy-duty highway trucks, as needed, which comply with most recent EPA standards for PM and NOx emissions, and which utilize low sulfur diesel fuel.	The EPA has developed heavy-duty engine and vehicle emission standards and highway diesel fuel sulfur control requirements which took effect with the vehicle model year 2007. As replacements are needed, Charleston County is complying with the EPA requirements.		FY2004	n/a directionally sound	n/a directionally sound	n/a	
To meet EPA requirements, convert to use of low-sulfur gasoline.	The County has run its heavy equipment on low sulfur diesel fuel since it entered the supply stream. We elected to maintain only one fuel type rather than risk putting the incorrect fuel in the highway trucks.		FY2004	n/a directionally sound	n/a directionally sound	n/a	
Consider pilot/test of bio-diesel fuel for limited vehicle use.	In conjunction with area fleets and diesel users (ex.: CARTA, school district), County fleet staff may test a B20 bio-diesel fuel in designated vehicles. A tank for joint use would be established in the Azalea Road area, filled by a local supplier with a soy-diesel mix. Cost subsidies are being investigated to promote this project. It is recognized that bio-diesel fuels increase lubricity and engine efficiency; and also lower particulate matter although increasing NOx emissions.	In April 2006 Charleston County submitted a grant request to the SC Budget and Control Board for funding to create an above-ground tank and infrastructure to be dedicated to biodiesel/low sulfur diesel fuel; and also for supplemental funding for the higher cost of biodiesel in place of the 620,000 gallons of diesel fuel used by the County yearly.	FY2007	n/a directionally sound	n/a directionally sound	n/a	

A. Control Measure under Consideration	B. Summary Description of Measure	C. Program/Measure Status	D. Specific Implementation Date	E. VOC Reduction	F. NOx Reduction	G. Resources (FTE's, \$\$)	H. Additional Information
Develop Best Practices for driving and fleet fueling.	Working with involved departments, staff formulated Best Operational Practices for driving and fueling County fleet. While these may be related to ozone reduction, they are applicable throughout the year. They encourage fueling early or late, limiting idling, frequent tire pressure checks, driving at the speed limit, no topping off gas tank, etc. Department heads incorporate BOPs into operating procedures to the extent feasible		FY2004	n/a directionally sound	n/a directionally sound	n/a	
Addressing public transit options, pedestrian and bike lanes and other planning strategies in comprehensive land-use planning.	Charleston County has adopted a comprehensive land use plan, which is updated every five years. As appropriate, this plan encourages the development of mass transit opportunities, trip reduction, alternative transportation methods and mixed-use communities.	Related to the Charleston County Transportation Sales Tax (1/2 cent), the Transportation and Greenbelt Advisory Boards have completed their recommendations to County Council on projects to be funded by the tax. (Reports can be accessed through the county website: www.charlestoncounty.org .) Both boards found a high interest in walking and biking trails. These boards recommend spending plans for the \$1.3 billion to be collected over 25 years for transportation, greenbelt and public transit. In addition, the Charleston Area Regional Transportation Authority (CARTA) has used the first infusion of Sales Tax money to purchase smaller buses for local routes, and has increased the number of routes. Ridership has increased significantly. The CARTA Board now is contracting for park/ride spaces to increase convenience for commuting.	FY2004	n/a directionally sound	n/a directionally sound	n/a	
Modify lawn maintenance practices to discourage use of gas-powered engines during high ozone hours; and develop department guidelines to replace two-cycle small engines with four-cycle engine small equipment.	Charleston County will take measures to modify lawn maintenance practices and utilization of small engine equipment so as to limit ozone-producing emissions. Most County lawn maintenance is under private contract. The RFP will be amended to include clean air practices during the next bidding cycle. Many departments maintain small engine equipment for specific purposes. Two-cycle equipment will be replaced with four-cycle when practical.		FY2007	n/a directionally sound	n/a directionally sound	n/a	
Employ building energy conservation measures.	With the use of technology, Charleston County's Facilities Management team currently employs energy conservation measures at its high use facilities (the Public Services Building, Judicial Center, County Office Building, Charleston Center, Main Library, and the Historic Courthouse) by scheduling down time of utilities when unoccupied or reducing utility services when not required. This program has been expanded to include all Regional Libraries and any new large facilities coming on line. An HVAC control system has been installed in the Otranto Regional Library and the new Johns Island Regional Library. Where ever possible, new energy efficient light bulbs (T-8s and low pressure sodium) are being used. Energy audits are conducted for our large facilities either in-house or by contract. We use premium efficient components when replacement parts are required for condensers, compressors, hot water heaters, motors, etc.		FY2004	n/a directionally sound	n/a directionally sound	n/a	
Study and implement flex hours.	Charleston County has expanded the practice of flexible hours, which is now utilized by many departments. This has reduced traffic congestion and vehicle emissions created by all employees arriving and leaving at the same time.	The final report of the independent Charleston County Commission on Management, Accountability and Performance, released in August 2005, recommended increased use of flex time as a way to extend public service hours and improve employee working environment. In response, both the Business License and Human Resources departments have implemented flex-time schedules, thus 'growing' the number of County offices utilizing this tool.	FY2004	n/a directionally sound	n/a directionally sound	n/a	
Encourage walking, biking, car-pooling	Bike racks are installed at County libraries, and at the Judicial Center complex in downtown Charleston. Additional racks will be installed at other facilities. As part of the ozone education program, employees will be encouraged to walk or bike to work, and/or to look for safe opportunities to ride-share or car-pool.	Our in-house survey of carpooling interest continues on the intranet. To date, there have been 55 responses. Respondants are matched by area, and encouraged to carpool. The County Wellness Committee met with our regional transportation authority (CARTA) to promote bus use through sale of bus passes. The Wellness Committee participated in Ride Your Bike to Work Week.	FY 2005	n/a directionally sound	n/a directionally sound	n/a	
Other activities within the County	The City of Charleston is enrolled in the Cities for Climate Protection campaign, and has joined the U.S. Mayors Climate Protection Agreement, working with the Sierra Club to find ways to reduce greenhouse gases.	Energy saving improvements have reduced municipal carbon dioxide emissions by 15,219 tons over the first four years of the effort	FY2000				
Formation of regional stakeholders group.	Charleston County meets with BCD Council of Governments, Berkeley and Dorchester Counties, urban and rural transportation authorities, Clemson Extension, MUSC, school districts, area industry, environmental groups and others. Discussions center on education, transportation, intermodal/alternative transportation strategies, advanced technology vehicles, alternative fuels, car-pooling and use of public transit, development of park and ride facilities to complement public transit routes, etc. This group continues to evolve and grow. We have met on the following dates: July 24, August 14, September 18 and November 13. in 2003; and February 26 in 2004.	The regional stakeholder group has not met during this period. However, the in-house planning group continues to meet to plan implementation of our strategies to fulfill our requirements. Current focus is on an expanded hybrid fleet, use of clean fuels, and reducing fleet size and emissions.	FY2004	n/a directionally sound	n/a directionally sound	n/a

B-C-D, SC (Designated - Attainment)							
<p style="text-align: center;">JUNE 2006 DORCHESTER COUNTY</p> <p>Based on stakeholder consultation and taking into consideration resource and political constraints, the following emission reduction strategies remain under consideration. The County will continue to evaluate the air quality within the county and may implement one or more of the following measures under consideration.</p>							
Stakeholders Groups	Continue with Local and Regional Stakeholders Groups to remain current with citizen concerns and who may be experimenting with new ozone technology developments	Shareholder groups have not met this period.	These programs have been in existence since April 2003.	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
CHATS support.	The Charleston Area Transportation Study Group continues to establish SCDOT priorities for the Tri-county area. Dorchester County will continue to support those programs to reduce ozone. e.g. Mass Transit initiatives, "Park & Ride" programs, more "walk and bike trails" and initiatives that promotes car pooling.	Charleston Area Transportation System CHATS support continues.	CHATS has been active for over a decade. It is not likely to change in the immediate future.	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Government sets the example.	Study to promote more telecommute positions, provide incentives for car pooling when assigning parking spaces. Stagger work hours for employees to avoid rush hour traffic. Continue with flex-work schedules and 4 day work week. Establish policies to encourage pooling of lunch orders from same vender. Study County owned vehicle schedule to shuttle personnel between upper and lower county. Promote high-bred "alternative fuel" vehicles i.e. electric, bio-diesel, LP gas, ethanol etc. for vehicle fleet operations.	County programs and future ordinances are geared to consider new ozone standards.	This measure is an attempt to modify regulations and behavior over a period of time. Some of these practices have already been adopted.	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Solicit the schools to help in the education process.	There are short courses available to be introduced into the syllabus to discuss health hazards and other dangers of ground level ozone. Request Journalism students and/or English students to write articles about the dangers of ozone to be published in the local newspapers. Students encouraged to produce Educational video for television discussing the ozone issues.	Schools have ozone curriculum available when needed	This program will be initiated when EPA designates Dorchester County as borderline attainment	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Schools to review existing policies.	Student Transportation policy to be reviewed: more sidewalks and fewer parking spaces. Driving privileges for those students making grades. Assigned parking for only those students with exceptional need to drive. Minimal fee should be charged for cost of security cameras and police personnel in the parking areas. All others must use bus. Construction of schools will include sidewalks and bike trails on all major arteries within a mile radius of the school. Establish rules for vehicle idle times for those waiting for students to be released. (Parents vehicles and busses.)	Schools consider reduced ozone standards when developing new policies.	This program will be initiated when EPA designates Dorchester County as borderline attainment	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Educate the Public as to "What is OZONE?"	TV News and Meteorologists will broadcast existing and forecast Ozone conditions. In addition, they will provide recommendations for their audience similar to their current hurricane readiness announcements.		This program is scheduled to start in May 2004.	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Educate the Public as to "What is OZONE?"	An OZONE tent will become a part of the festivals and fairs in the local area to pass out brochures and tracts about ozone. Various contests and prizes can be awarded to stimulate interest.	Control programs to educate the Public will be initiated when conditions warrant. As a note of interest, Dorchester County residents continue to benefit from the public service announcements (Public Education) pertaining to Ozone from the local TV weatherman broadcast from Charleston County.	This program will be initiated when EPA designates Dorchester County as borderline attainment.	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Educate the Public as to "What is OZONE?"	A traveling lecturer will visit hospitals, Nursing Homes, Senior Citizen Centers to educate those who are most at-risk. Recommend minimum outdoor activity during periods of high ozone.	Control programs to educate the Public will be initiated when conditions warrant. As a note of interest, Dorchester County residents continue to benefit from the public service announcements (Public Education) pertaining to Ozone from the local TV weatherman broadcast from Charleston County.	This program will be initiated when EPA designates Dorchester County as borderline attainment.	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Educate the Public as to "What is OZONE?"	Publish brochure of house-hold tips to reduce ozone. Schedule mowing and fueling vehicles in early morning or late afternoon to avoid the high ozone period. Select electric operated equipment and avoid gas operated landscape equipment.	Control programs to educate the Public will be initiated when conditions warrant. As a note of interest, Dorchester County residents continue to benefit from the public service announcements (Public Education) pertaining to Ozone from the local TV weatherman broadcast from Charleston County.	This program will be initiated when EPA designates Dorchester County as borderline attainment.	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Planning for future green spaces.	Tree and Landscape Ordinances should encourage use of more deciduous shade trees and fewer pine trees. SC DOT should be required to provide landscaped medians. Industrial developers should be required to provide a landscape plan for the entire site. Commercial builders should landscape parking lots and entrances. Residential builders should avoid strip clearing and have a minimum landscape requirement for treed streets, landscaped entrances and a minimum landscape requirement for each lot.	New Planning & Zoning Ordinances consider reduced ozone standards.	Some of these programs are currently in existence. We can do better	n/a directionally sound	n/a directionally sound	n/a	See Comment #3
Planning for a future with fewer vehicles.	Communities are planned with a grocery/drug/hardware stores within walking distance from homes. Promote mixed zoning, i.e. stores with residential spaces on the upper floors. Encourage more sidewalks and bike trails. Cluster development, Smart Growth, PUD's, mass transit, energy efficient building materials, fuel efficient vehicles, should be encouraged.	New Planning & Zoning Ordinances consider reduced ozone standards.	Comprehensive Plan for Government agencies already includes these ideas. Promote adoption of these ideas in future ordinances.	n/a directionally sound	n/a directionally sound	n/a	See Comment #3

A. Control Measure under Consideration	B. Summary Description of Measure	C. Program/Measure Status	D. Specific Implementation Date	E. VOC Reduction	F. NOx Reduction	G. Resources (FTE's, \$\$)	H. Additional Information
Comments: 1. December 2004 - SC EAC SIP - activity not quantified for several reasons (first) in accordance with EAC Protocol, after all adopted Federal and State controls were accounted for in the modeling, it was determined that local controls were not necessary to demonstrate attainment of the 8-hour ozone standard. Measures were submitted by the local areas to show their continued support and commitment to the EAC process. (second) this activity is directionally sound and should provide air quality benefits and in some cases measurable results. The progress toward implementing this activity and the benefits derived will be documented as a part of the ongoing reporting requirements. 2. December 2003 - Progress Report - See - http://www.scdhec.gov/eqc/baq/html/eap_dpr_eac.html - additional information provided by the county to include "findings", "advantages/disadvantages", "recommendations", "costs", etc.... 3. March 2004 - Local Early Action Plan - See - http://www.scdhec.gov/eqc/baq/html/eap_dpr_eac_0304.asp 4. June 2004 - Progress Report - See - http://www.scdhec.gov/eqc/baq/html/eap_dpr_eac_0604.asp 5. December 2004 - Progress Report - See - http://www.scdhec.gov/eqc/baq/html/eap_dpr_eac_1204.asp 6. December 2004 - SC EAC SIP - Including Appendix 8 (Local Early Action Plans and the Air Quality Awareness and Improvement Policy) and Appendix 16 (County Level Emission Reductions and Descriptions for the Ozone EAC Areas) - See - http://www.scdhec.gov/eqc/baq/html/eap_sip.html 7. April 20, 2005 - Correspondence to Mr. Palmer including clarifying supplemental information to the EAC SIP submittal of December 2004. - See - http://www.scdhec.gov/eqc/baq/html/eap_sip.html 8. June 2005 - Progress Report - See - http://www.scdhec.gov/eqc/baq/html/eap_dpr_eac_0605.asp
